

PROFIBUS Diagnosis Custom-Made

TREBING + HIMSTEDT

Your Partner for easy-to-use Diagnosis Concepts

xEPI 2 in powerful Combination – Professional PROFIBUS Diagnosis for your Plant

The xEPI 2 diagnostic unit for permanent PROFIBUS network monitoring is the central point of a seamless diagnosis concept. The intelligent solution can automatically identify network malfunctions, display them via web browser, and trigger respective email alerts. For an integrated, immediately applicable diagnosis concept, the xEPI 2 commissioning service and PROFIBUS Scope diagnosis tool are the perfect complements.

xEPI 2 Commissioning Service: Professional Plug-and-Play Setup

You want to use your xEPI 2 units for PROFIBUS monitoring and as a network access as quickly as possible? But your staff does not have the time to install and start up several networks? Or you want to start into permanent monitoring with an immediate professional network analysis, and want to make sure that you are going to fully benefit from all diagnostic possibilities in the future? Our xEPI 2 commissioning service provides assistance by our PROFIBUS experts during installation and initial start-up, as well as advice on optimal application of the solution in your plant.

Your benefits from our xEPI 2 Commissioning Service:

- Quick and reliable start-up by experienced experts
- Minimum installation and configuration effort on your part
- Professional consulting based on your requirements
- Complete setup of network monitoring of all connected PROFIBUS networks
- First network analyses incl. reports (“Professional“)

Article No.: 10002931

xEPI 2 Commissioning Service “Basic“

- **Installation support**
- **Initial start-up of all xEPI 2 units**
- **Brief introduction into product operation**

Offer available in connection with purchase/delivery of 5 or more xEPI 2 units

Net Price: EUR 800

Optional: In case of faulty networks, an additional network analysis and targeted troubleshooting can be done (to be invoiced on a time-and-material basis). Alternatively, ask for our detailed quotation for a status analysis of the entire network and our comprehensive PROFIBUS measurement services.

Strong Duo for PROFIBUS Diagnosis: xEPI 2 and PROFIBUS Scope

Specialized in ad-hoc troubleshooting and professional FAT/SAT, the PROFIBUS Scope diagnosis tool is the perfect addition to permanent network monitoring with the xEPI 2. As a software for measurements during operation, the user-friendly PROFIBUS Scope is not only popular with maintenance staff, but also provides high-performance analysis functions tailored for PROFIBUS experts' requirements. While the xEPI 2 identifies complex error patterns, the PROFIBUS Scope is the tool for in-depth analyses down to telegram level. The PROFIBUS Scope is already indispensable during professional FAT/SAT, as it automatically generates comprehensive documentations of measurement results.
